

## Seed Germination Activity

*The Germination of seeds activity was done on 29th July 2019 with the aim to demonstrate how plants develop from seeds. Our pre primary kids learnt about the steps of growing a plant. They sowed the seeds in their respective pots and were really excited to see their seed grow within a few days. Children had a great time and a hands -on- experience on sowing seeds in their small pots and giving life to a plant. It was an enriching experience altogether.*
