

ASSEMBLY

SAVE WATER, SAVE LIFE

A class assembly was presented on the topic 'SAVE WATER SAVE LIFE' on 19th August 2019 by the students of Class V-D with an objective to sensitize students about the judicious and wise use of our most precious natural resource i.e. water. It is the essential component for sustaining life on land.

The assembly commenced with the Morning Prayer by the choir group followed by the thoughts and news. With the medium of a poem, the topic was introduced to the audience. Then a skit was presented by the students in which they created a neighbourhood scene where people are wasting water on various occasions and in contrast to it the scenes from the future were also shown which depicted that how people might struggle in future to get water. The message of the skit was loud and clear that either we conserve water or learn to live without it.

The students also briefed about the present conditions at various parts of the world where people are facing water scarcity and due to which their survival is in danger as they do not have access to clean water. They emphasized on the need to save water and taking water crisis as a serious crisis. They also discussed ways to conserve water like saving water from taps, converting toilet to low flush and proper water resource management through reducing and reusing it and this change can only be brought if we all work together. It was indeed an enriching and eye-opening experience for all the students and teachers present there.

Then the class teacher's talk was presented by Ms. Shivani Kashyap.

Our respected Principal ma'am, Ms Anjali Malik also addressed the issue and guided the students about the need of the hour to use water judiciously.

The assembly concluded with the national anthem.
