

Jaypee Public School, Noida Plantation Drive

Let's root for each other and watch each other grow.

On August 7, 2024, Jaypee Public School Noida hosted a planting campaign in school in association with Green Dream Foundation. Students in the environmental club participated in the initiative by adopting a young plant and planting it in the ground. The Green Dream foundation gave us the oleander plant, which has several therapeutic uses and is an air purifier. Both the requisite plantation skills and plant care knowledge were taught to the students. Children pledged to take good care of their plants. The aim of this exercise was to foster compassion in the kids and raise their level of environmental awareness. This modest action was taken by Jaypee Public School to improve the air quality index.
